nunii
LABORATOIRE

WE DO EVERYTHING RIGHT FOR YOUR SKIN

nunii a fusion of new and unique, evoking the beautiful simplicity and purity behind our brand. Our logo resembling the form of atom or molecule reflects the breadth of science and clinical precision that informs the creation of our products.

nunii laboratoire is a French biomedical research laboratory whose vision is to bring to the international aesthetic medicine market a portfolio of brands that anticipate and satisfy the desires and needs of women and men to have healthy beautiful skin.

World Leading Experts

We work with an international network of world leading experts in research and development, clinical research and regulatory, to bring to market our range of innovative medical devices and dermo-cosmetics.

Our core values:

- > Passion, Integrity
- > Commitment to excellence and people
- > Corporate social responsibility

Our commitments:

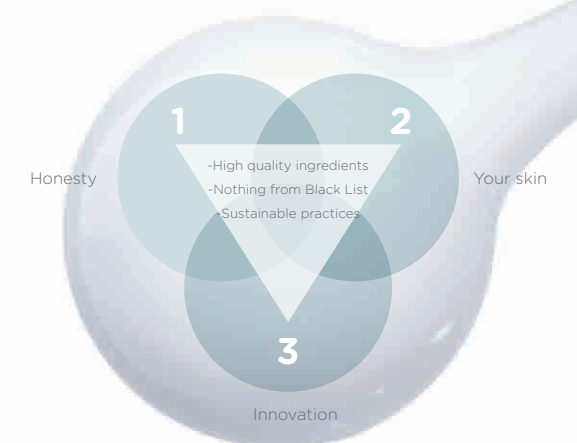

- Continuous improvement

From our very foundations **nunii** laboratoire's ethos has been based on a continuous improvement approach which aims to take into consideration the social economic and environmental impact

on all the areas of our business. The objective being, to define concrete actions to meet economic based challenges in order to reconcile, profitability with the environment and social equity.

■ Safety & Efficacy

We at **nunii** laboratoire commit that our ingredients and products are clinically proven and safe for people with limited impact on the environment. Our objective is to meet both doctor and patient expectations. **nunii** laboratoire acts by limiting controversial and irritating ingredients in our products and by communicating this openly and transparently. We strive for the highest ethics in our selection of and practices with partners and clients.

SCIENTIFIC PARTNERSHIP

nunii Laboratoire collaborates with the team U1065 of the Mediterranean centre for molecular medicine under the responsibility of INSERM (the French National Institute of Health and Medical Research) and UNS (University of Nice Sophia Antipolis), in an ambitious fundamental research programme, on the mechanisms regulating melanogenesis, to bring true innovation to the aesthetic medicine market.

UNIQU-WHITE® SYSTEM

is a unique expert system, exclusively dispensed by dermatologists and medical practitioners, that is clinically proven to help target and reduce lentigo, melasma and dark spots.

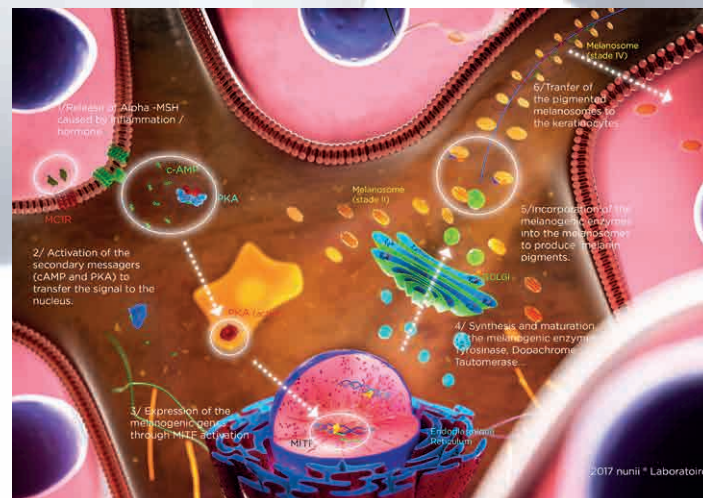

[UNIQU-WHITE® system]

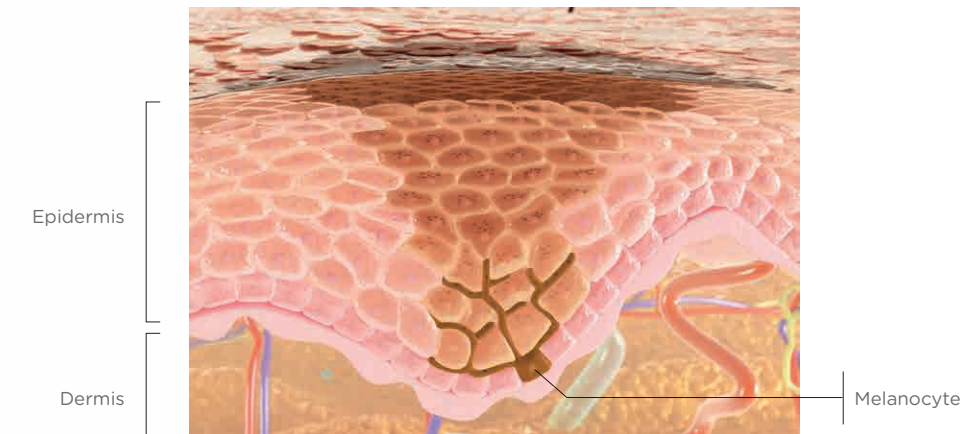

Our technological innovation

nunii Laboratoire has identified a unique complex of active ingredients to help down regulate the melanogenesis.

This has enabled us to develop a safer and more effective depigmenting solution than others widely used on the market today.

CROSS SECTION OF THE SKIN

This simple 3 step system is specifically formulated to respect sensitive and treated skin by excluding known controversial and irritating ingredients.

The benefits

[UNIQU-WHITE®SYSTEM]

is the first on the market to combine a unique synergistic complex of active ingredients for a global action on the main biological mechanisms responsible for skin pigmentation:

1. Depigment

[UNIQU-WHITE® EXPERT PIGMENT CORRECTOR]

(patent pending), is an expert booster which combines a complex of active ingredients, in their purest most effective form, to target the main steps in the melanogenesis mechanism .

2. Repair & regenerate

[UNIQU-WHITE® REVITACTIV ENERGIZING MOISTURIZER]

contains an effective repair and regeneration complex which helps to reduce free radical damage and revitalize your skin.

Dermatologically tested, it strengthens the natural skin cell protective layer and intensively nurtures the skin.

3. Soothe & protect

[NUNII® LABORATOIRE INRECOV SOOTH & PROTECT SPF 15]

with its unique complex of ingredients helps to reduce skin redness, to soothe skin irritation and to optimize skin recovery. Combined with a broad spectrum SPF 15, it protects from UVA rays and HEV light to help prevent sunburn and pigmentation spots.

Properties:

- Dermatologically tested
- Hydroquinone FREE
- Kojic Acid FREE
- Azelaic acid FREE
- Fragrance FREE
- Paraben FREE
- Airless Bottle

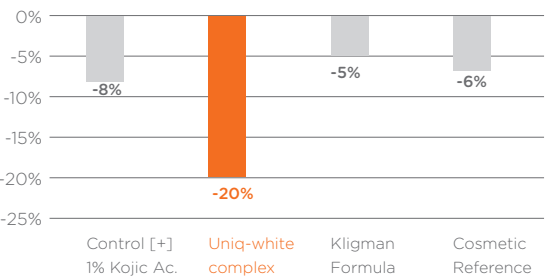

SCIENTIFICALLY PROVEN RESULTS :

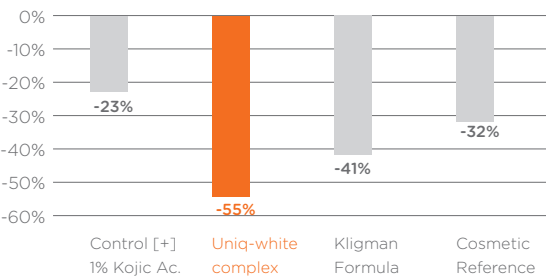

in-vitro study

Comparative study of UNIQ-WHITE® Complex on depigmenting properties. Study performed by an accredited¹ French Laboratory on Reconstructed Pigmented Human Epidermis (RPHE) phototype 5. Results obtained after 10 days compared to the non-treated RPHE.

DIMINUTION OF SUPERFICIAL PIGMENTATION

DIMINUTION OF MELANIN PRODUCTION

in-vivo study

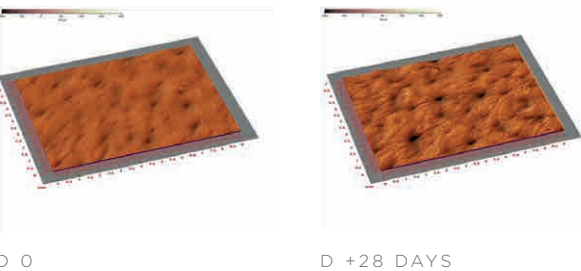

Clinical assessment of the depigmenting, texturing properties and tolerance of the UNIQ-WHITE® System. Study performed on 22 volunteers with melasma and lentigo for a period of 56 days².

■ **DEPIGMENTING PROPERTIES MELANIN INDEX** Statistically significant improvement in the reduction of the melanin index - $p < 0.00001$ after 56 days

94% OF THE VOLUNTEERS SHOWED IMPROVEMENT -33% AVERAGE REDUCTION OF THE MELANIN INDEX³ -40% MAXIMUM REDUCTION OF THE MELANIN INDEX

■ **SKIN TEXTURING PROPERTIES** The statistical analysis shows a significant improvement in skin firmness and tensing effect.

-38% AVERAGE REDUCTION IN SKIN LAXITY AFTER 28 DAYS⁴

Fringe Projection

The reappearance of the skin micro-relief with discrete primary and secondary lines intersecting at regular intervals, is a good indicator of the improved quality of the underlying organization of the skin tissue.

1. Accredited by the French ministry of higher education research 2. Study conducted according to the good clinical practice GCP/ICH E6, by an independent laboratory accredited by the ANSM (French Health Product and Safety Agency), to conduct clinical and biomedical studies. 3. After 56 days Average values obtained on 8 out of 22 volunteers. Global average reduction -24.2%. 4. Average value obtained on 6 out of 17 volunteers. Global average reduction -12% - $p < 0.001$

BEFORE & AFTER PHOTOS

Original untouched pictures from in-vivo study².

Dermatological evaluation of the tolerance

81% OF THE VOLUNTEERS HAD A GOOD TO EXCELLENT TOLERANCE TO UNIQ-WHITE SYSTEM.

Self evaluation of the volunteers

■ Perception of the subjects about the protocol

1 The homecare protocol is easy to use 89 %

■ Perception of the subjects about the results

2 I think that my skin tone is more even looking. 78 %
3 I think that my pigmented spots have decreased in number and size. 67 %
4 I think that my skin is more luminous. 78 %
5 The results of this treatment meet my expectations. 67 %

■ UNIQ-WHITE® EXPERT PIGMENT CORRECTOR

PATENT PENDING

Hydroquinone FREE
& Kojic acid FREE
50 ml

The benefits

[uniq-white® Expert Pigment Corrector] (patent pending), is part of the 3 step uniq-white® protocol that is clinically proven to help target and reduce lentigo, melasma and dark spots. The uniq-white® protocol is exclusively dispensed by dermatologists and medical practitioners.

Biological mode of action

[uniq-white® Expert Pigment Corrector] with its unique patented formulation, is the first expert booster on the market to combine 9 pure and synergistic active ingredients, for a global action on the main biological mechanisms responsible for skin pigmentation.

> **Mandelic acid, Salicylic acid and Retinol A** help to downregulate melanin synthesis and to slough off

melanin-filled cells to even out the skin tone and complexion.

> **Alpha-arbutin, Licorice root extract and Undecylenoyl phenylalanine** help to inhibit basal melanogenesis induced by α -MSH stimulation or UVB irradiation.

> **Ethyl L Ascorbic Acid -Niacinamide and Resveratrol** potent antioxidants help to prevent oxidative DNA fragmentation, to reduce free radical production and to reduce the melanosome function and maturation.

■ NUNII® LABORATOIRE COMBINATION PEEL

Airless
pump system
100 ml
pH 1.6

Targets

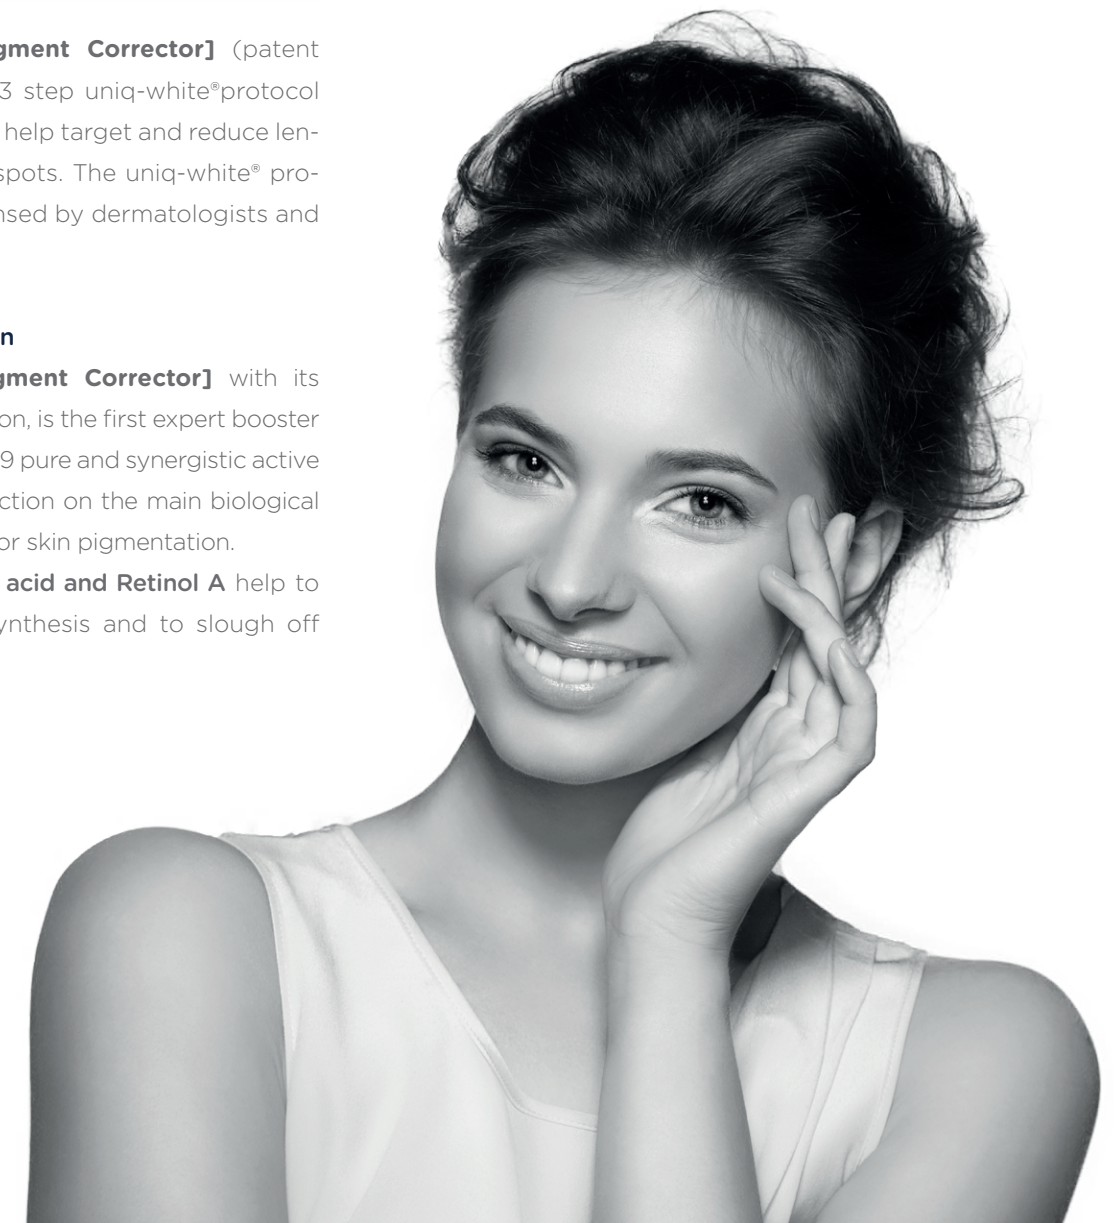

Dark spots, acne, wrinkles

The benefits

[Nunii® Laboratoire Combination Peel] is a professional exfoliator which creates a chemical desquamation of the keratinized epidermal skin cells in preparation for the application of other skin creams. This product is suitable for skin prone to acne, wrinkles and pigmentation disorders.

Biological mode of action

Glycolic Acid, Lactic Acid,
Salicylic Acid, Mandelic Acid.

■ NUNII® LABORATOIRE

INRECOV SOOTHE & PROTECT SPF 15

Oxybenzone FREE
Octocrylene FREE
50 ml

The benefits

[Nunii®Laboratoire INRECOV Soothe & Protect SPF 15] with its unique complex of ingredients helps to reduce skin redness and soothe skin irritation to optimize skin recovery after aesthetic treatments. Combined with a broad spectrum SPF 15, this all-in-one cream is ideal for sensitive skin.

It contains 80% mineral filters to minimize the use of controversial endocrine disrupting chemical UV, filters on post aesthetic treated skin, while providing quality UV protection. If used as directed with other sun protection measures decreases the risk of skin cancer and early skin aging caused by the sun.

Biological mode of action

> **Titanium Dioxide, Zinc Oxide:** nunii®Laboratoire INRECOV Soothe & Protect SPF 15 is uniquely formulated to protect from 93% of UVB rays and 100 % of

UVA rays and HEV light and helps prevent sunburn and pigmentation spots.

> **Asiaticoside, Madecassic acid, Asiatic acid:** of 95% purity, enhance fibroblast proliferation, collagen intracellular fibronectin synthesis as well as prevent and inhibit synthesis by keratinocytes of pro-inflammatory mediators.

> **Glycyrrhetic acid** soothes the skin by downregulating the release of histamine and pro-inflammatory mediators.

> **Sodium Hyaluronate** with its low molecular weight penetrates easily into the skin and helps to stabilize the extracellular and intracellular matrix. The high molecular weight hydrates and plumps the skin and creates a protective barrier to help prevent trans-epidermal water loss.

> **The green pigment base** and pleasant texture, penetrates easily and perfectly camouflages the appearance of skin redness post (IPL, laser, peels), to minimize social eviction for the patient.

■ UNIQ - WHITE® REVITACTIV ENERGISING MOISTURIZER

Fragrance FREE
Paraben FREE
50 ml

The benefits

[Uniq-white® REVITACTIV Energizing moisturizer] day cream contains a unique repair and regeneration complex which helps to reduce free radical damage and revitalize your skin. Dermatologically tested, it strengthens the natural skin cell protective layer and intensively nurtures the skin. [Uniq-white® REVITACTIV Energizing moisturizer] day cream visibly helps to even skin tone and reduce the appearance of wrinkles for a brighter younger looking complexion.

Biological mode of action

> [Uniq-white® REVITACTIV Energizing] features a pure and concentrated blend of peptide, antioxidants and oligo elements designed to help biologically strengthen the skin's natural defenses.

> **Acetyl hexapeptide-51** is a powerful peptide to enhance the natural biological tissue regeneration process and help repair UV induced DNA damage.

> **Energizing oligo elements Complex** help to reduce the glycation effect on the collagen and elastin fibers.

> **Niacinamide** helps protect and repair UV stressed skin to maintain the firmness and smoothness of the skin.

> **Ethyl L Ascorbic Acid** a stabilized and biocompatible form of Vitamin C helps down regulate melanogenesis and stimulate the production of collagen and elastin.

■ UNIQ - WHITE® EVENLITE RADIANCE COMPLEX

Hydroquinone FREE
Kojic acid FREE
50 ml

The benefits

[Uniq-white®EVENLITE Radiance complex] promotes the disappearance of brown spots and uneven skin tone. The skin complexion appears more luminous and radiant. This night cream can be used all year round to maintain the results obtained with the uniq-white system protocol.

Biological mode of action

[Uniq-white®EVENLITE Radiance complex] combines 7 complementary active ingredients in a dermatologically tested, non-irritating formulation suitable for sensitive skins. This excellent tolerance, light penetrating texture helps restore a radiant complexion and helps prevent dark spots from appearing.

> **Lactic acid, Salicylic acid and Retinol A** to slough off melanin-filled cells and even out the skin tone and complexion.

> **Alpha-arbutin, Undeclenoyl phenylalanine and Mandelic acid** help to reduce free radical production and inhibit the tyrosinase activity of the melanocytes, a major cause of pigmentation and dark spots.

> **Ethyl L Ascorbic Acid** a stabilized biocompatible vitamin C to help combat oxidative stress and prevent dark spots and premature skin aging.
